Order from OTS $1.00 61-11885

Trans. of Voprosy Filosofii (USSR) 1960, v. 14, no. 9, p. 132-142

In the brief description here presented of the modifications to present-day genetic theories, and in the historical and differentiated approach to the basic problems of genetic succession, there is now basis for the representatives of both opposing trends [i.e. "classical" genetics vs. the theories of Lysenko] for cooperation in investigations of the complex phenomena of heredity, a knowledge of the laws of which is so essential in practice and theory. Complete agreement on all problems is not required here. Let contending of opinions continue. (Author)
